IMET Undergraduate Summer Internship

June 1-July 31, 2020
Applications Due by: March 9, 2020

Directed by Dr. Rosemary Jagus and Dr. Eric Schott

Made possible with support from the Bunting Family Foundation and the Institute of Marine and Environmental Technology

The Institute of Marine and Environmental Technology (IMET), part of the University of Maryland Center for Environmental Science (UMCES) recognizes the under-representation of several groups entering graduate programs in biological, marine and environmental sciences. IMET is committed to providing a welcoming environment to a diverse body of undergraduates with a goal of providing a strong pipeline of students continuing to higher degrees in these fields. To promote this, we are offering summer undergraduate internships from June 1 to July 31, 2020.

IMET, located in Baltimore’s Inner Harbor, offers students the opportunity to conduct a nine-week research project in marine sciences. Students will receive an orientation to working in a lab, seminars on the use of molecular techniques relevant to fisheries, aquaculture, energy production, and environmental research. Group activities will promote professional and life skill development, as well as science communication.

**Internship Benefits:** The internship includes a wage of $13.50 per hour for a 40-hour week. Accommodations at UMBC will be available for those from outside of the Baltimore Metropolitan Area. MTA passes will be provided for local travel in the Baltimore area.

**Internship Eligibility:** The internship is open to U.S. citizens and permanent residents who are enrolled as undergraduates in fields related to biological sciences and have a GPA of 3.0 or above.

**To Apply:** visit the website to download the application form. Send to imetsummer@umces.edu, along with your statement of interest (500 words), resume, and unofficial transcripts.
